

“Infectious clones”

“Infectious clones”

“DNA<>virus platform”

“Infectious clones”

Can make “real virus”? (Unclear)

“DNA<>virus platform”

“Infectious clones”

Can make “real virus”? (Unclear)

“DNA<>virus platform”

No different from “real virus.”

/

Fog of
Biowarfare

/

“IC” +
Scooby Doo

Same implications

Different weaknesses

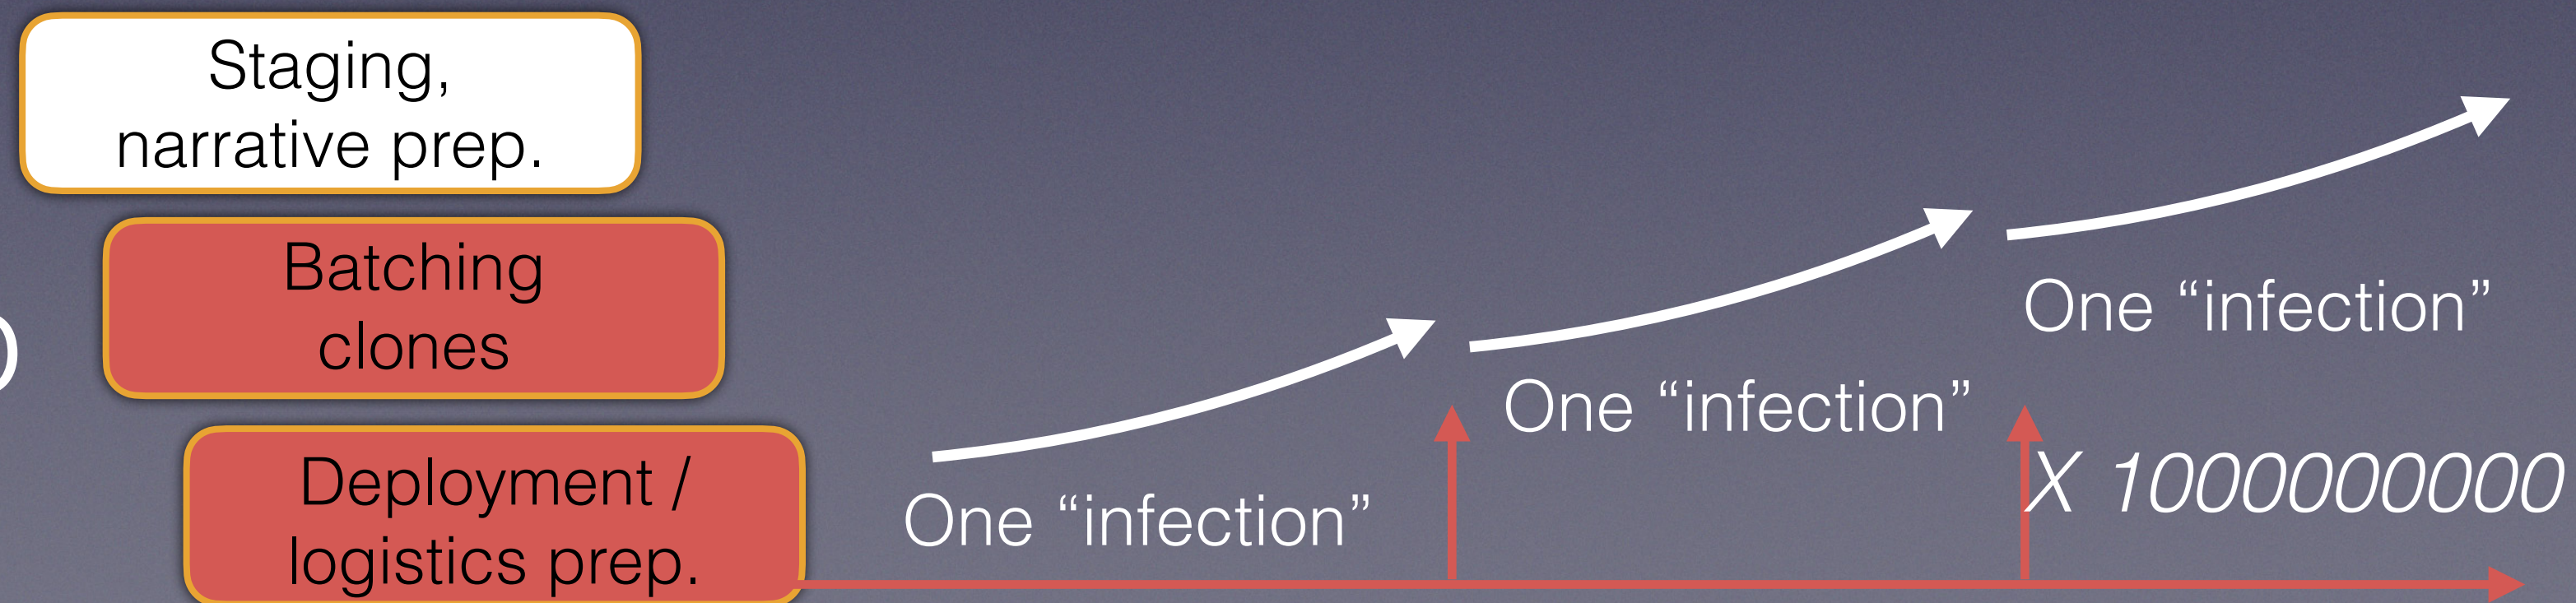

Pandora's GOF

Fog of Biowarfare

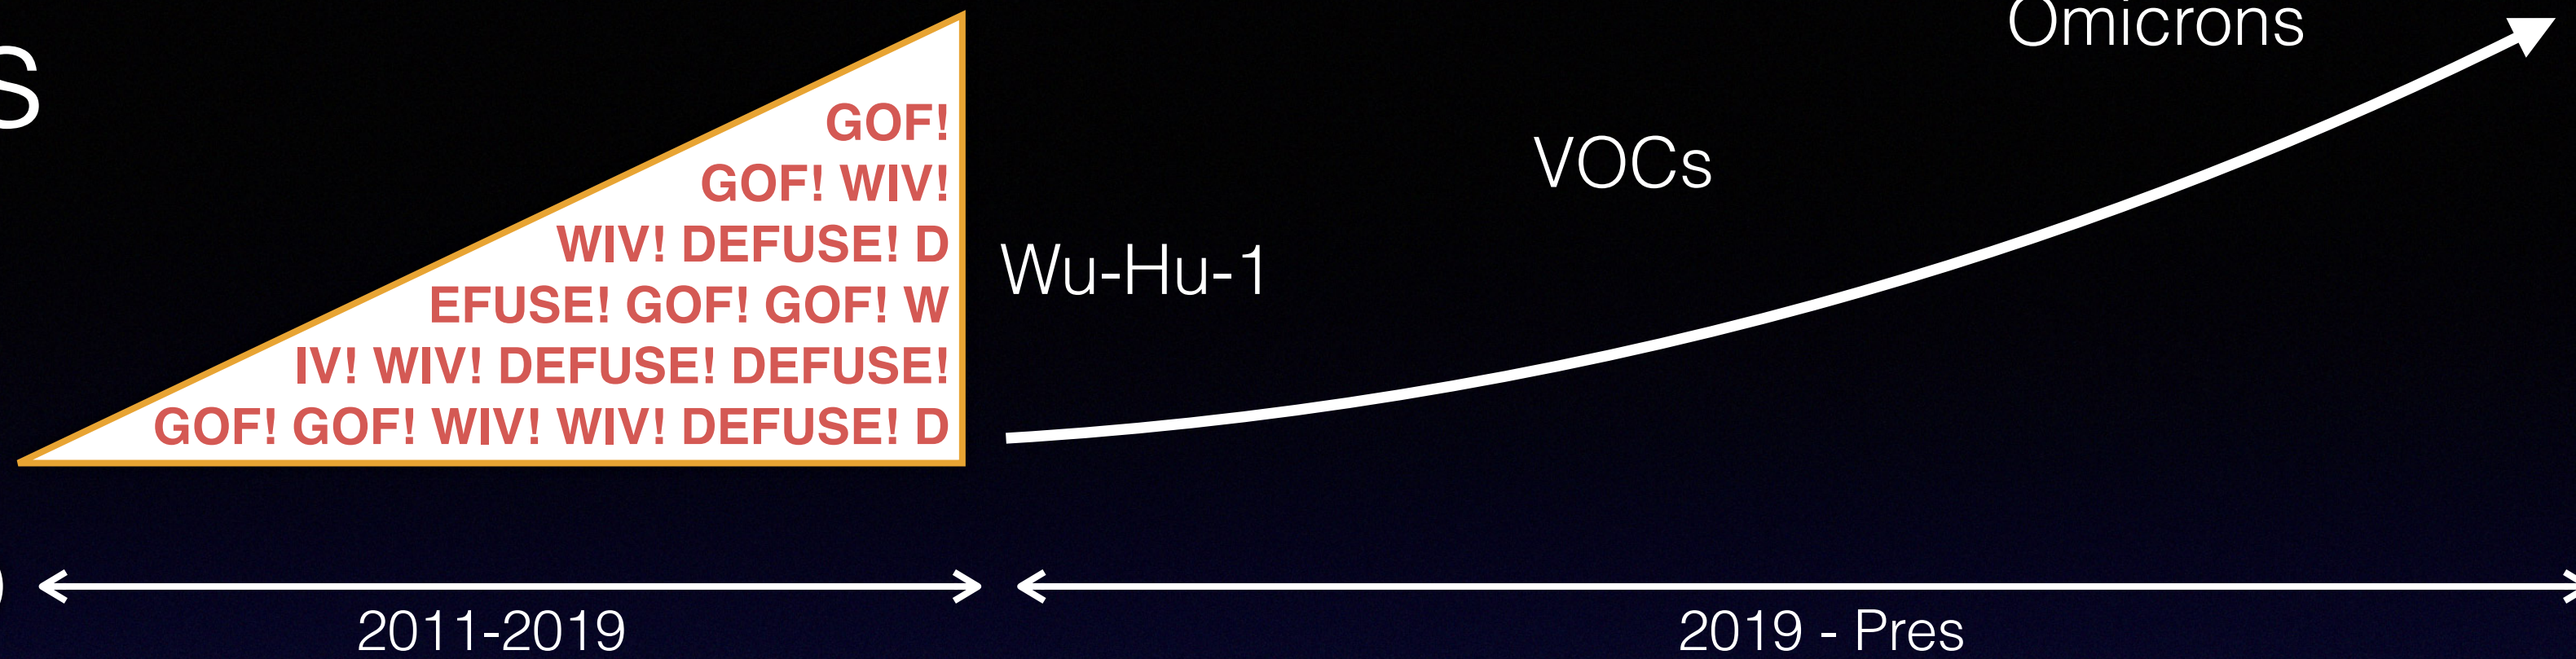

"IC" + Scooby-doo

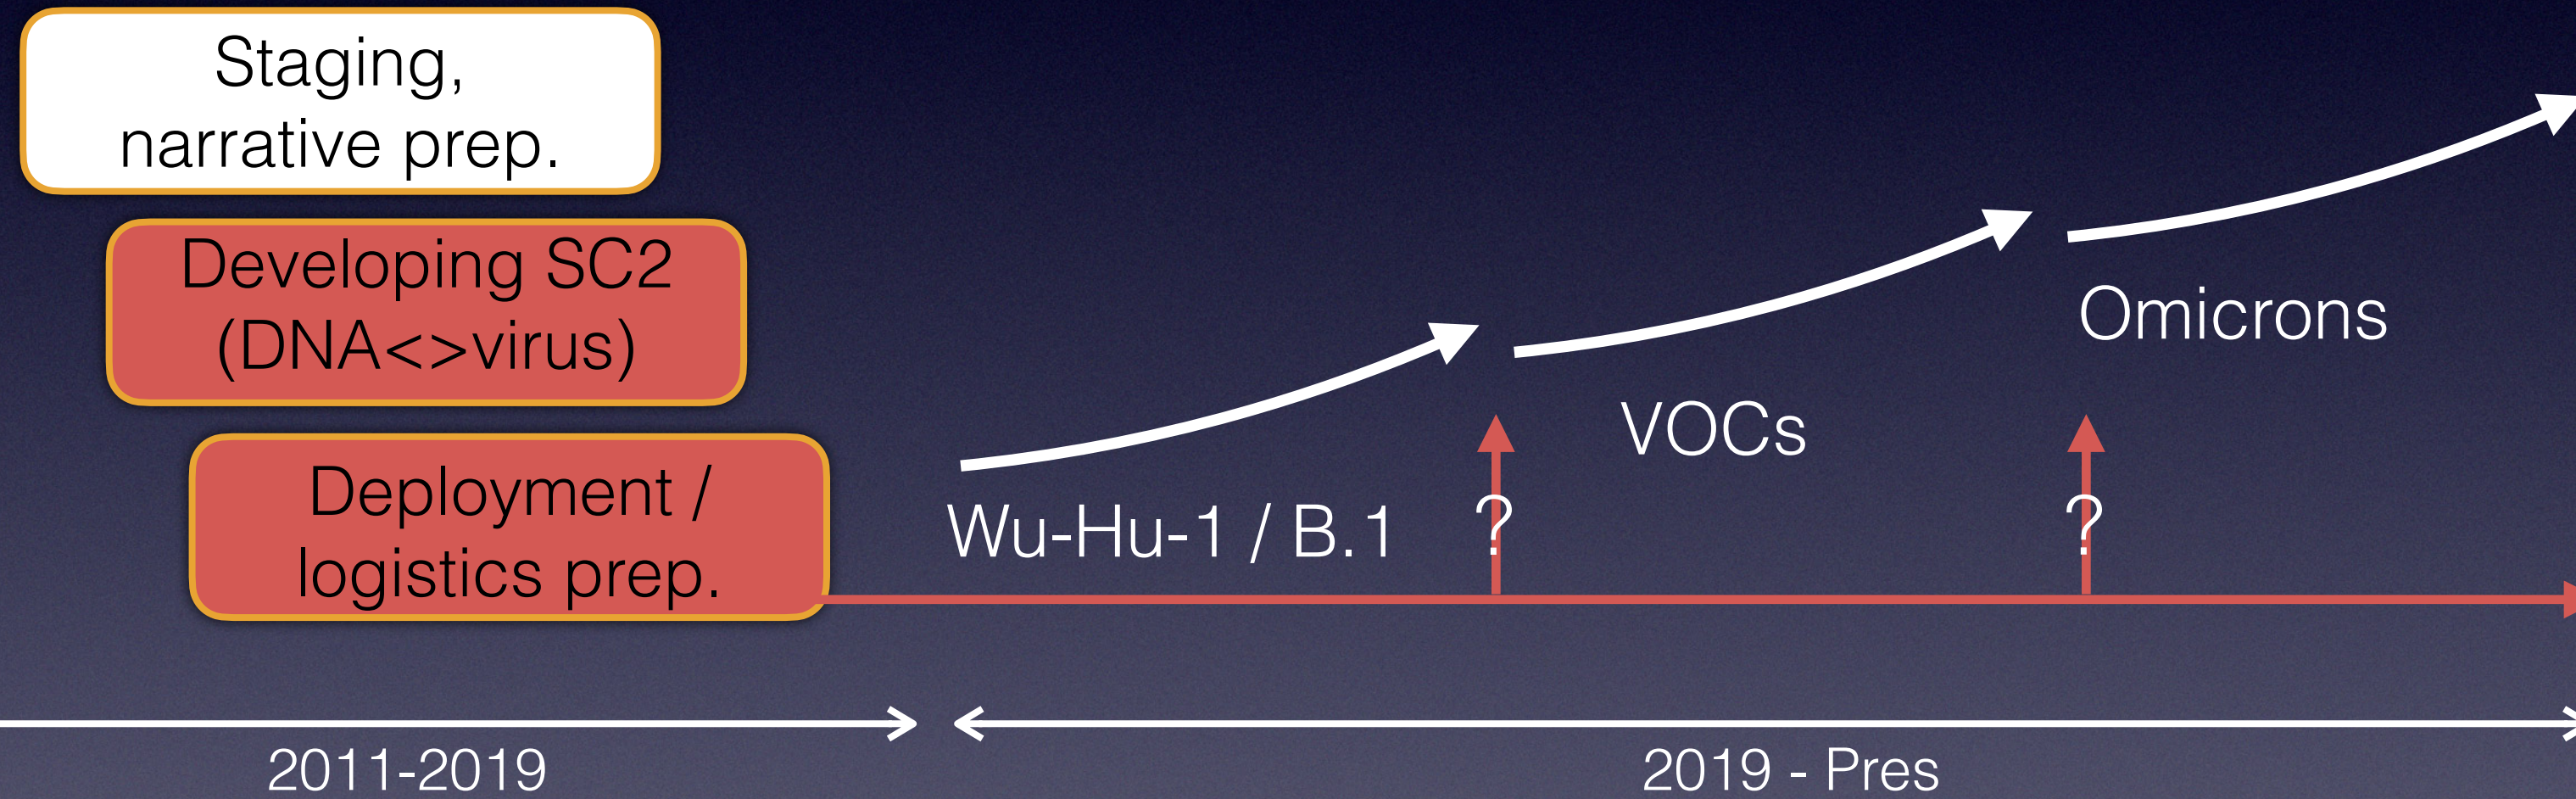

Implications

- "Doing GOF" is the only crime
- No infrastructure for deployment was put in place

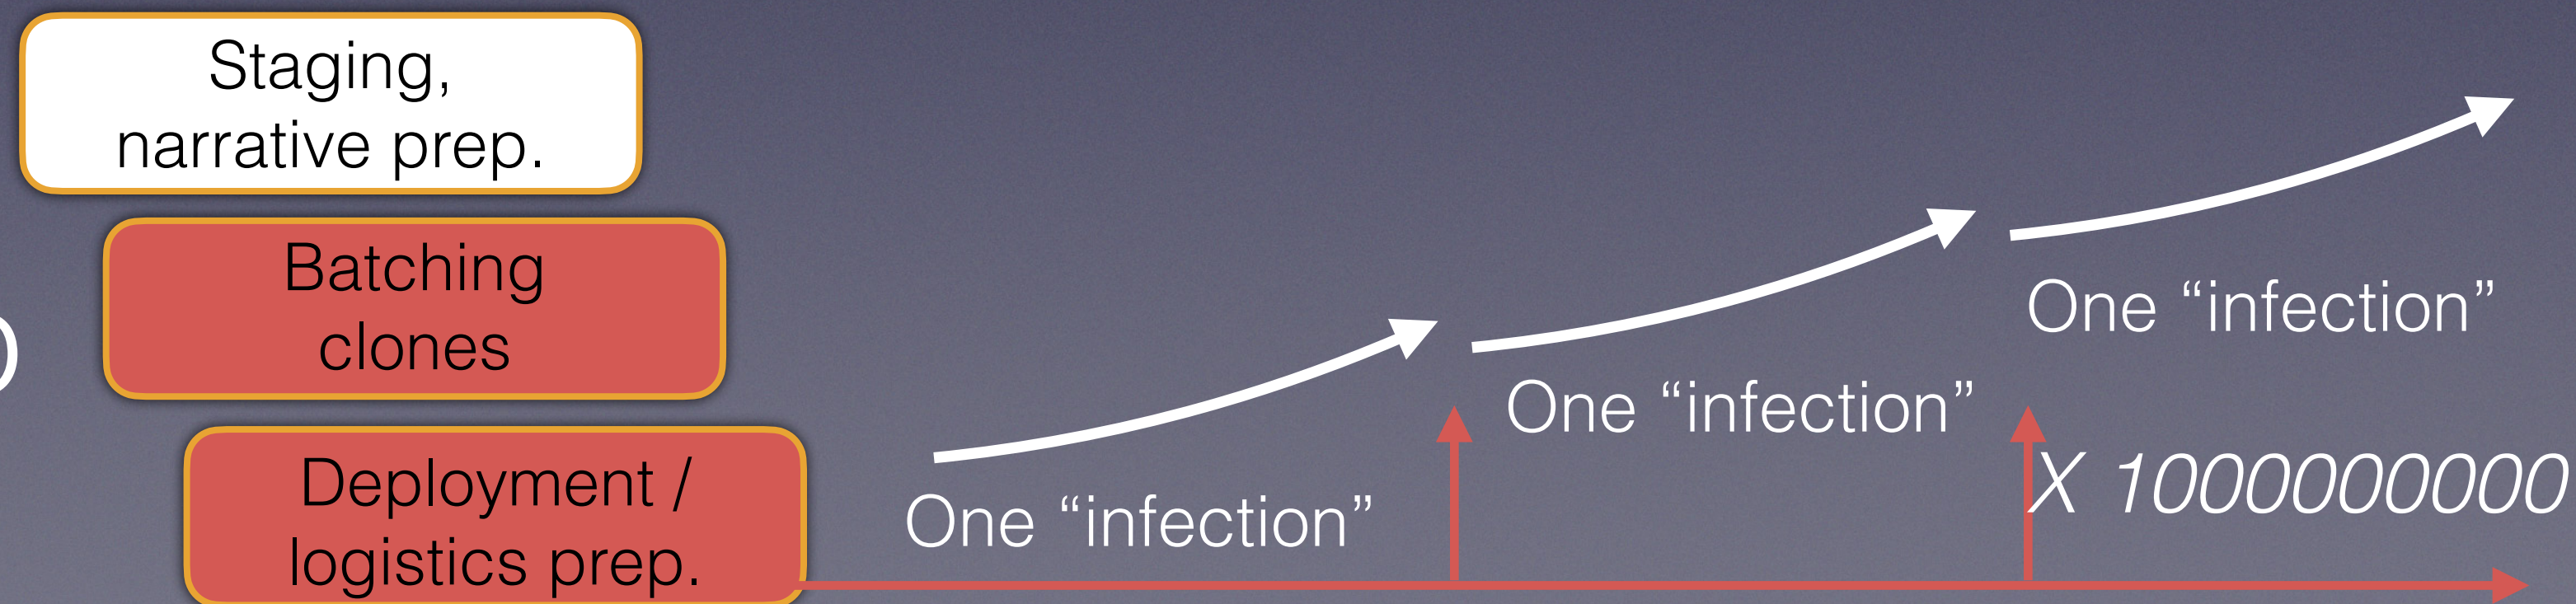

Pandora's GOF

Fog of Biowarfare

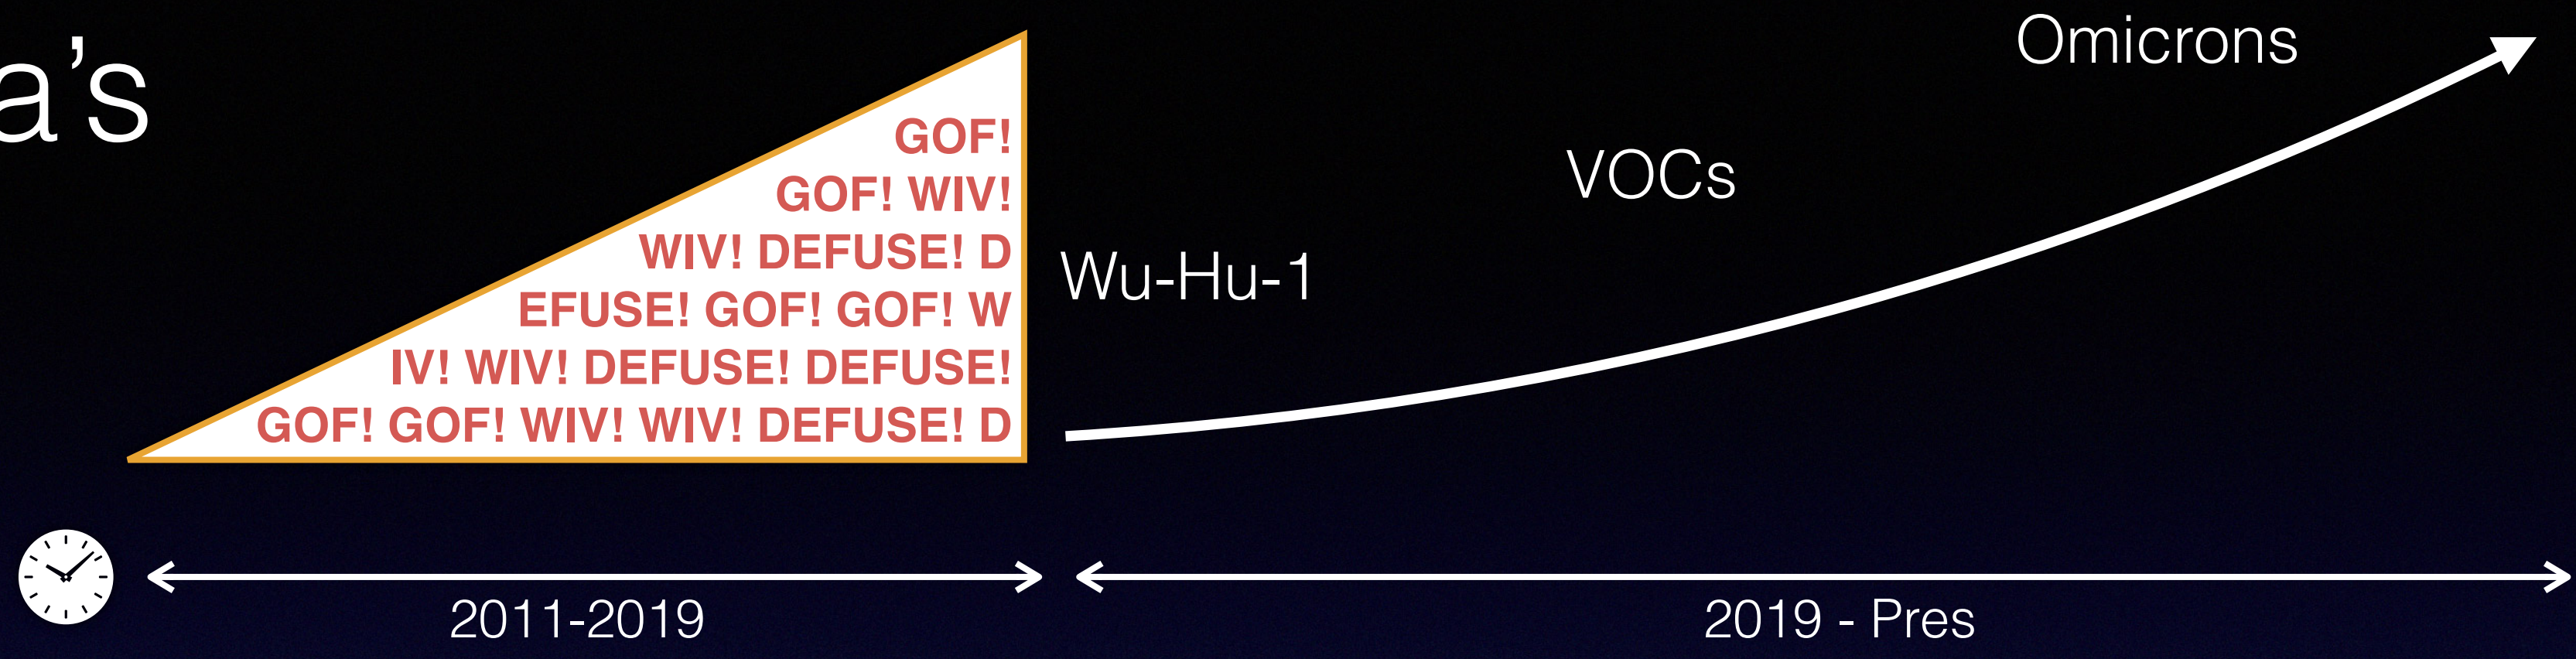

"IC" + Scooby-doo

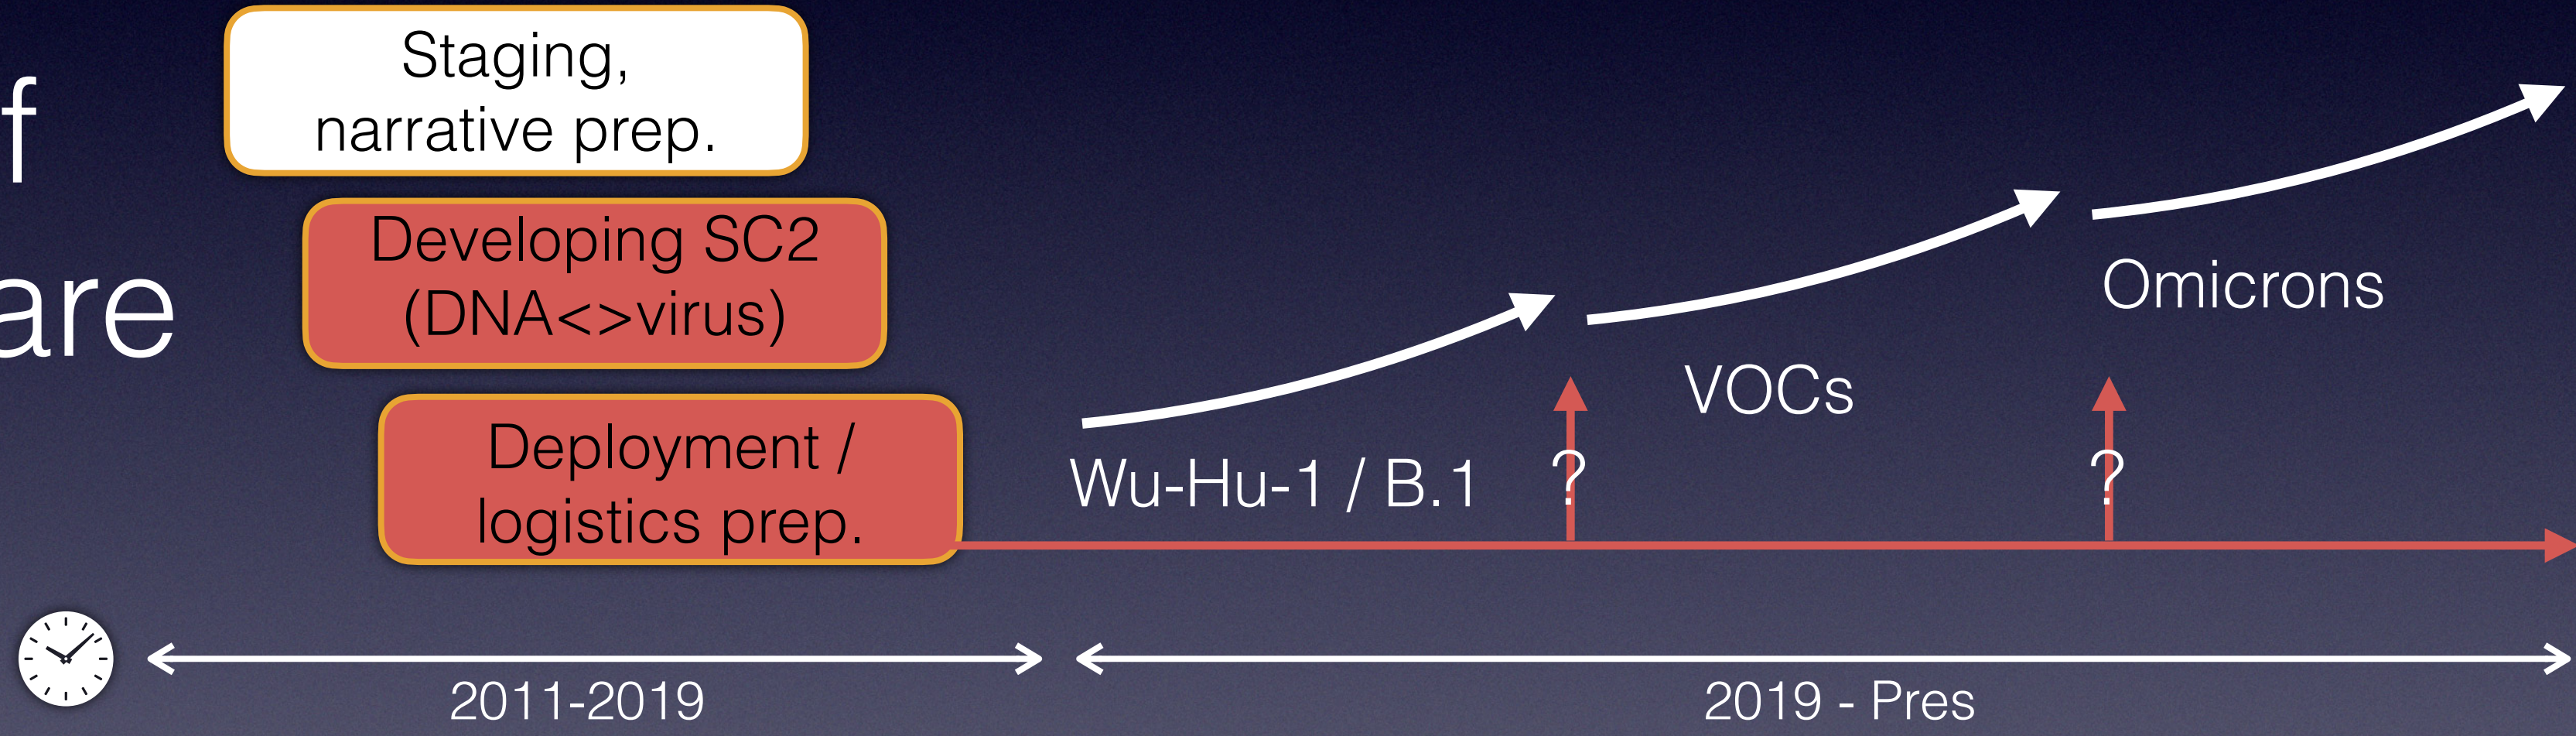

Implications

- "Doing GOF" is the only crime
- No infrastructure for deployment was put in place
- Virus development and release was intentional
- Thus, reasonable that some infrastructure for deployment would have been put in place
- Thus, no reason to rule out *some number* (2 - ∞) of multiple releases, updates
- Hence importance of "Infectious clones" (DNA<>virus platforms)

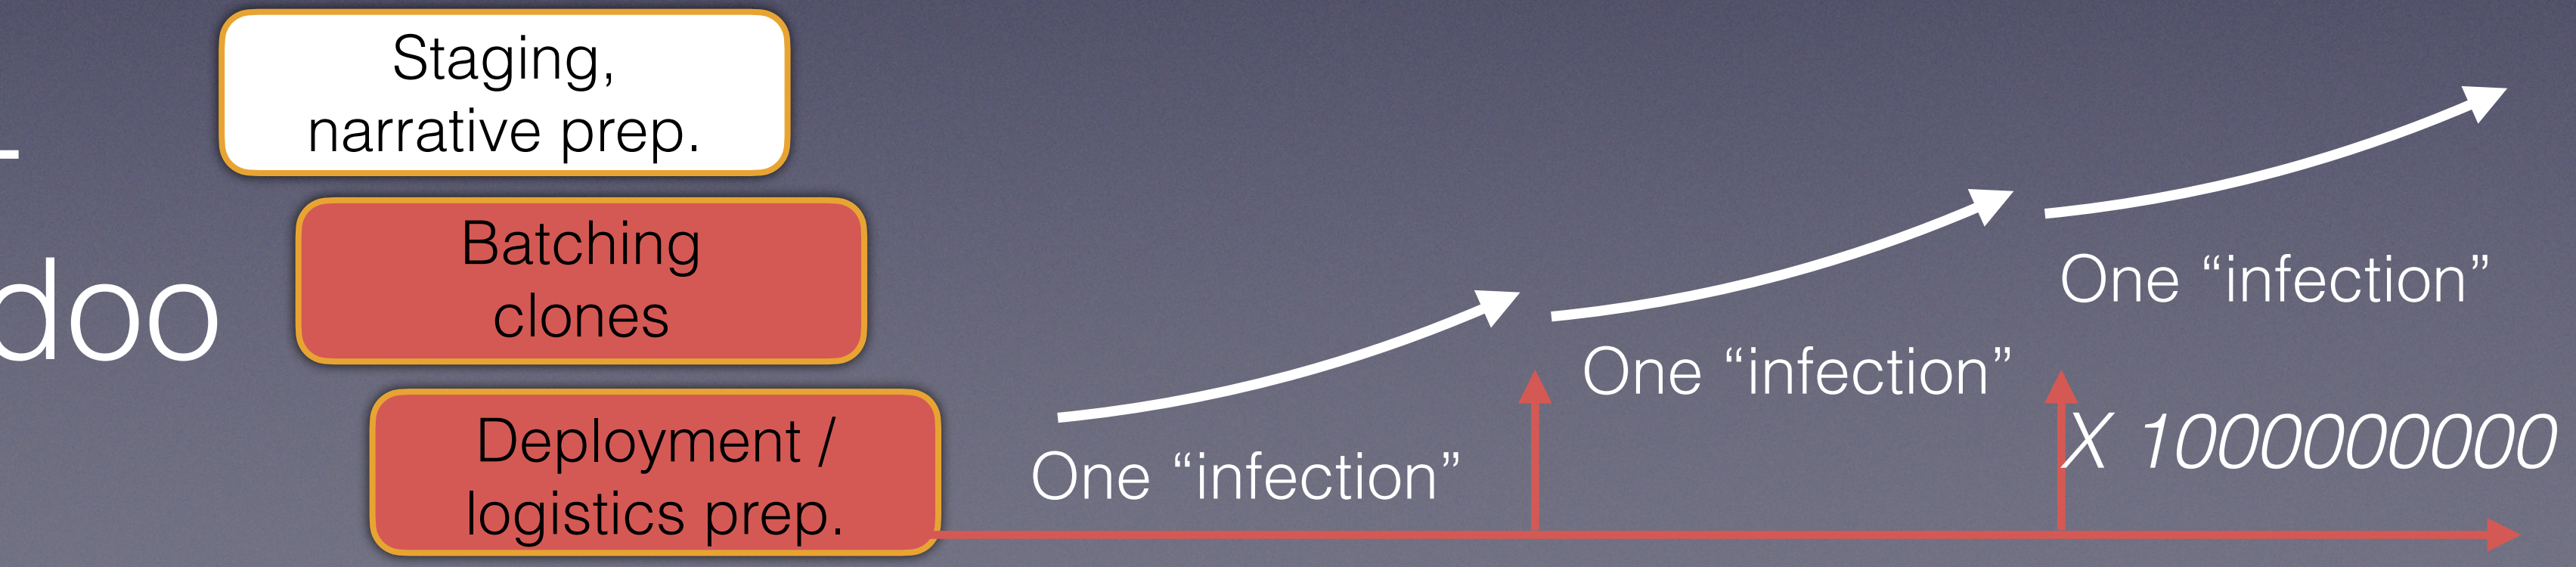

Pandora's GOF

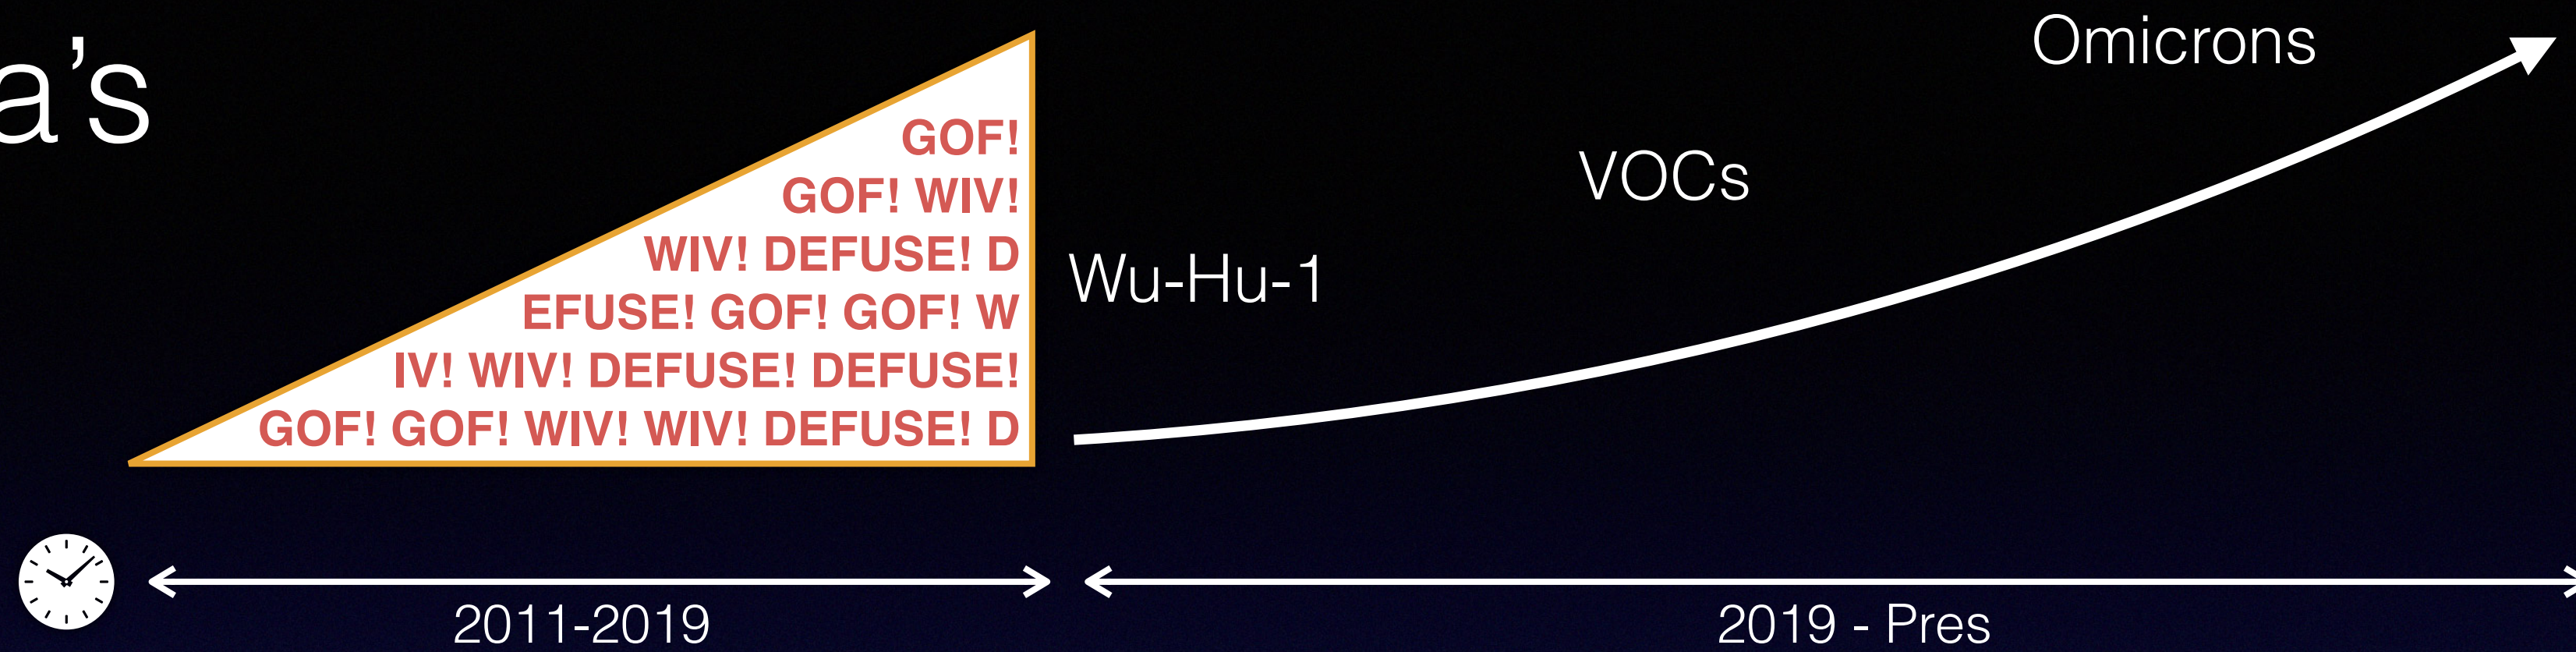

Fog of Biowarfare

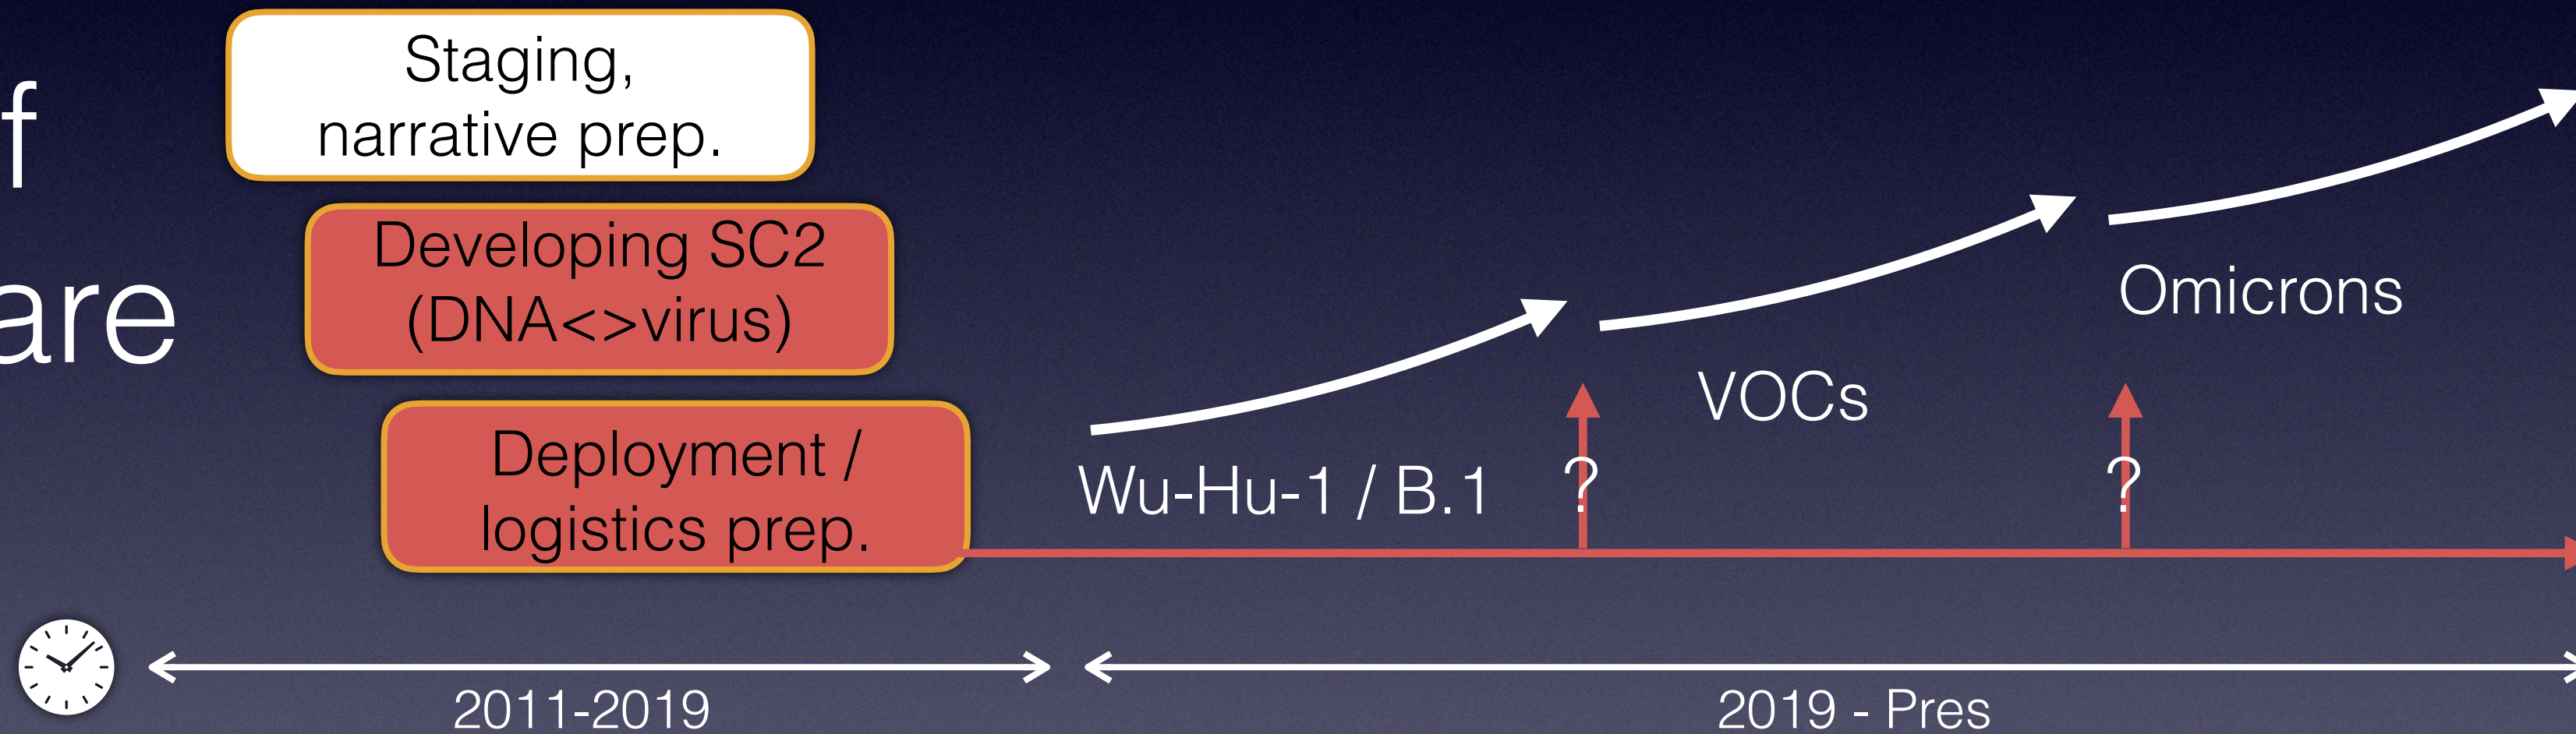

"IC" + Scooby-doo

Pandora's GOF

Fog of Biowarfare

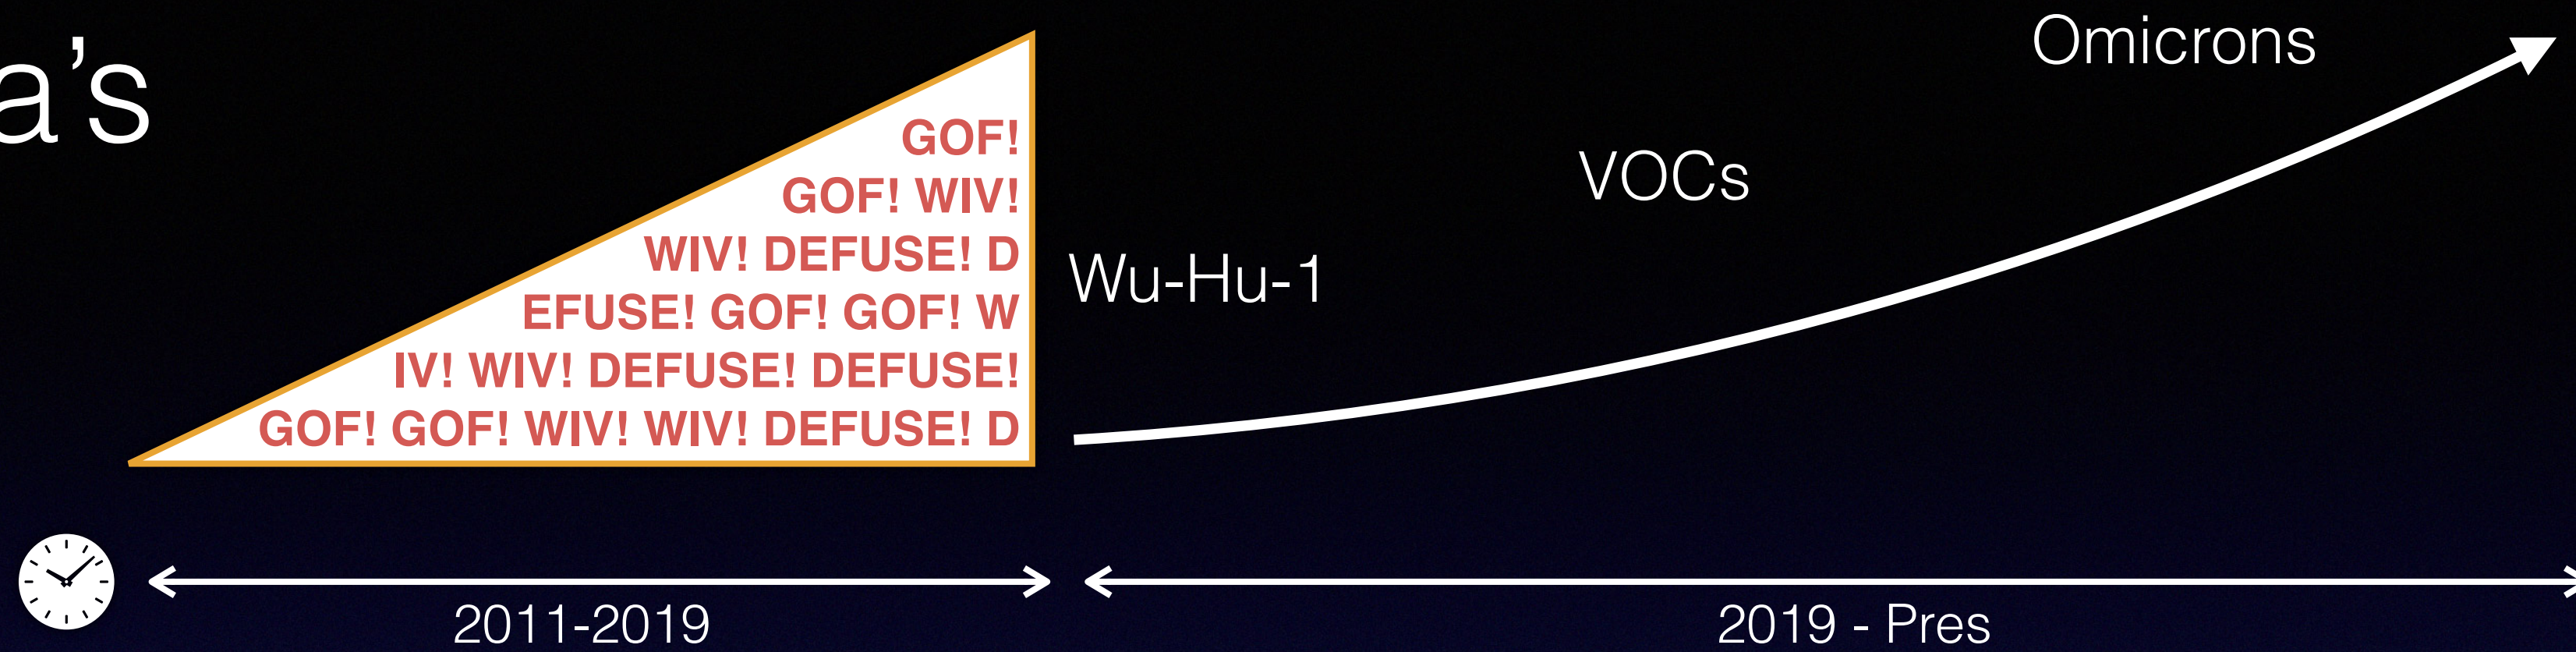

"IC" + Scooby-doo

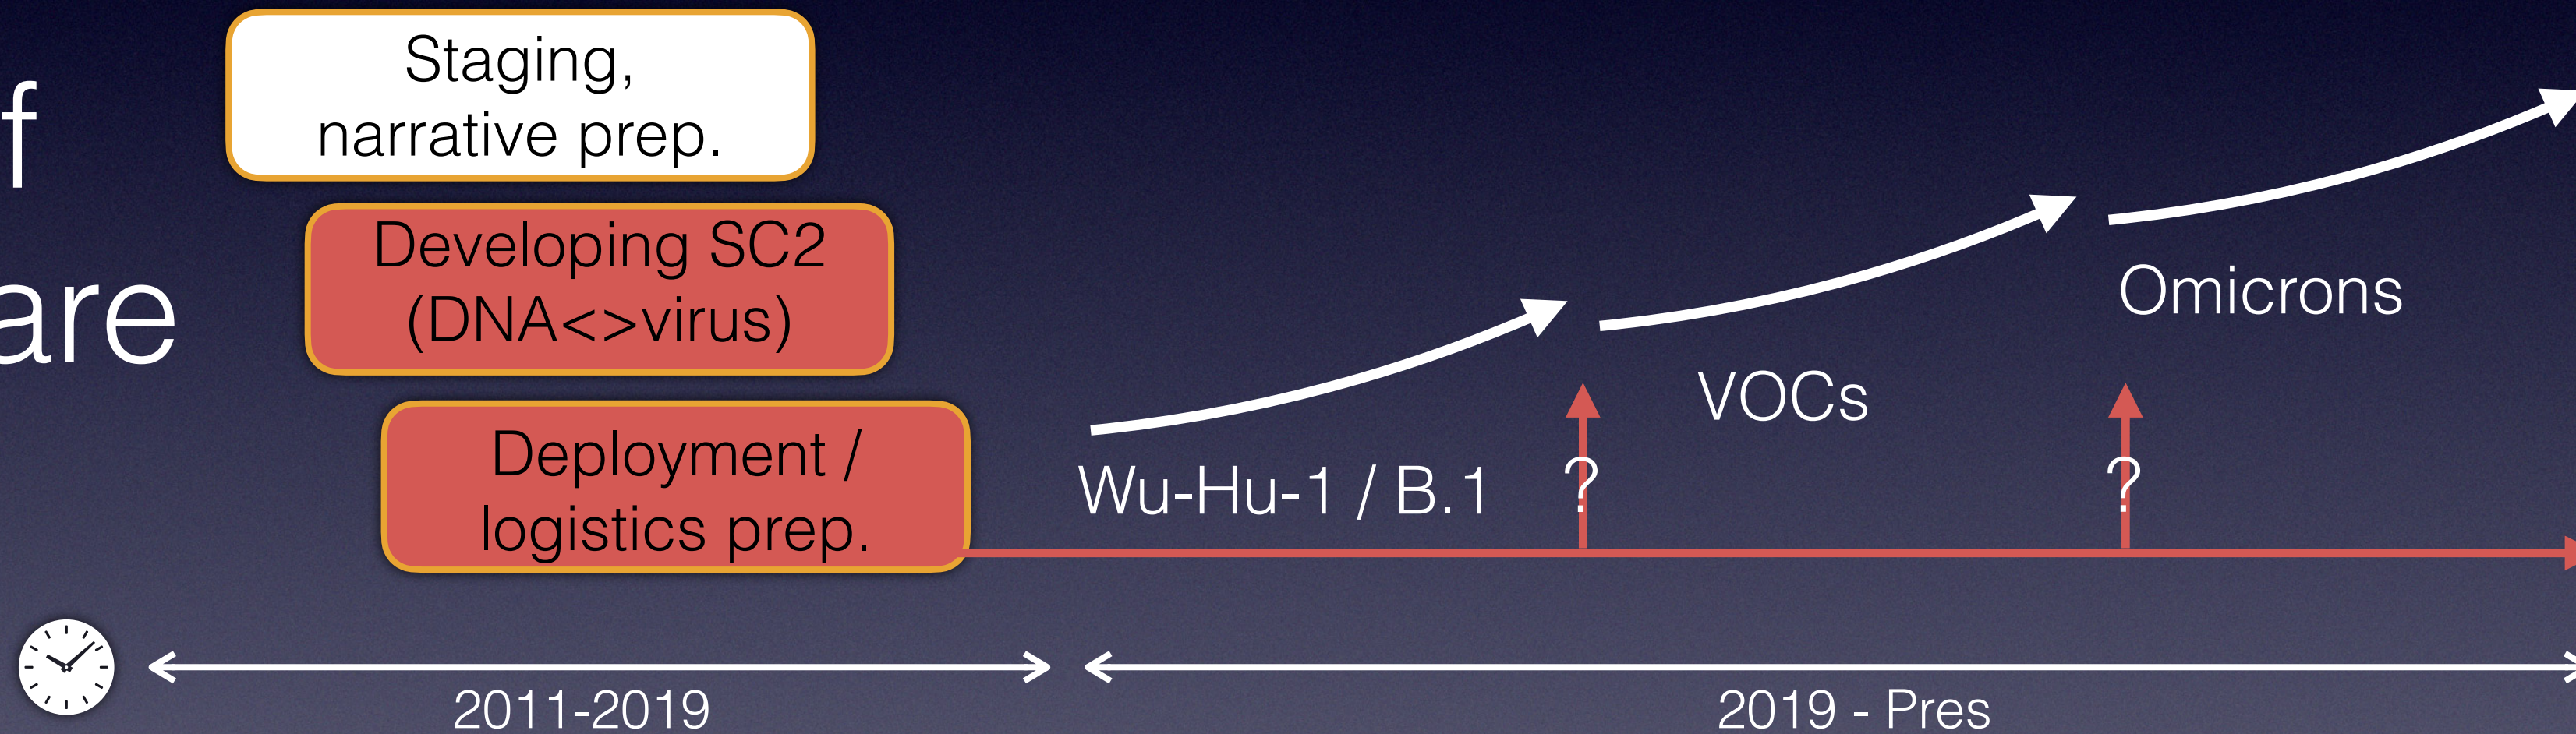

Weaknesses

- Ignores apparent signatures of intention (HIV inserts)
- Has no actual empirical precedent (WIV did not invent GOF)

Pandora's GOF

Fog of Biowarfare

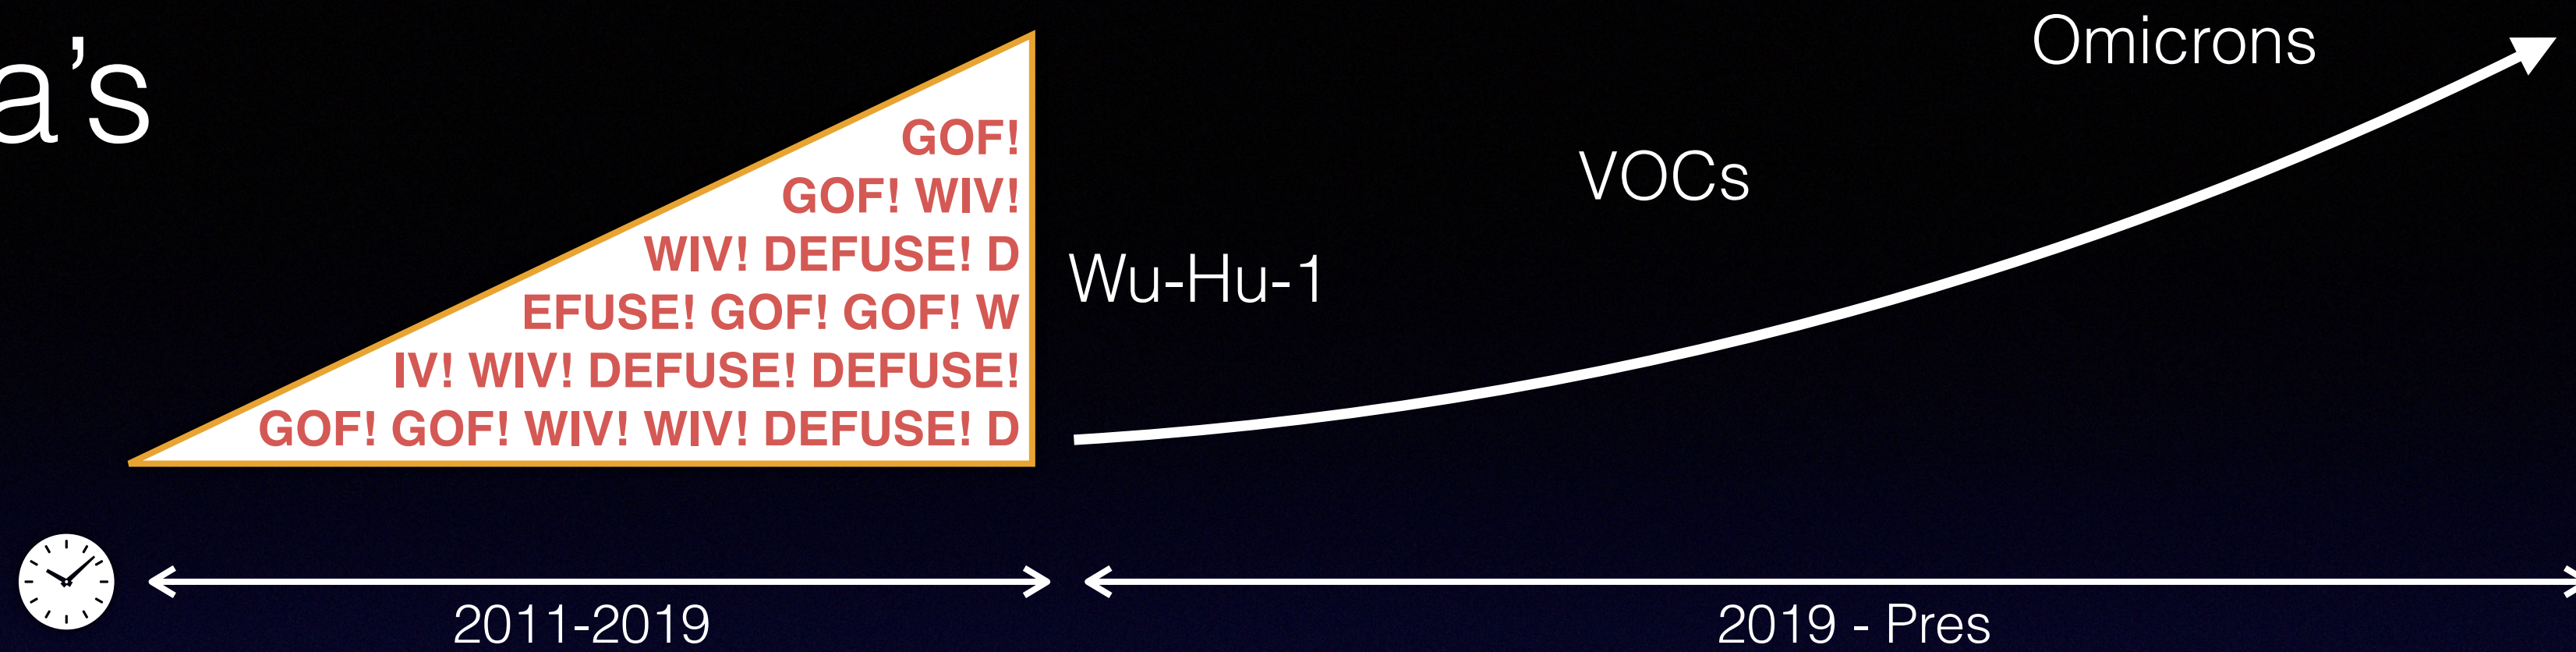

"IC" + Scooby-doo

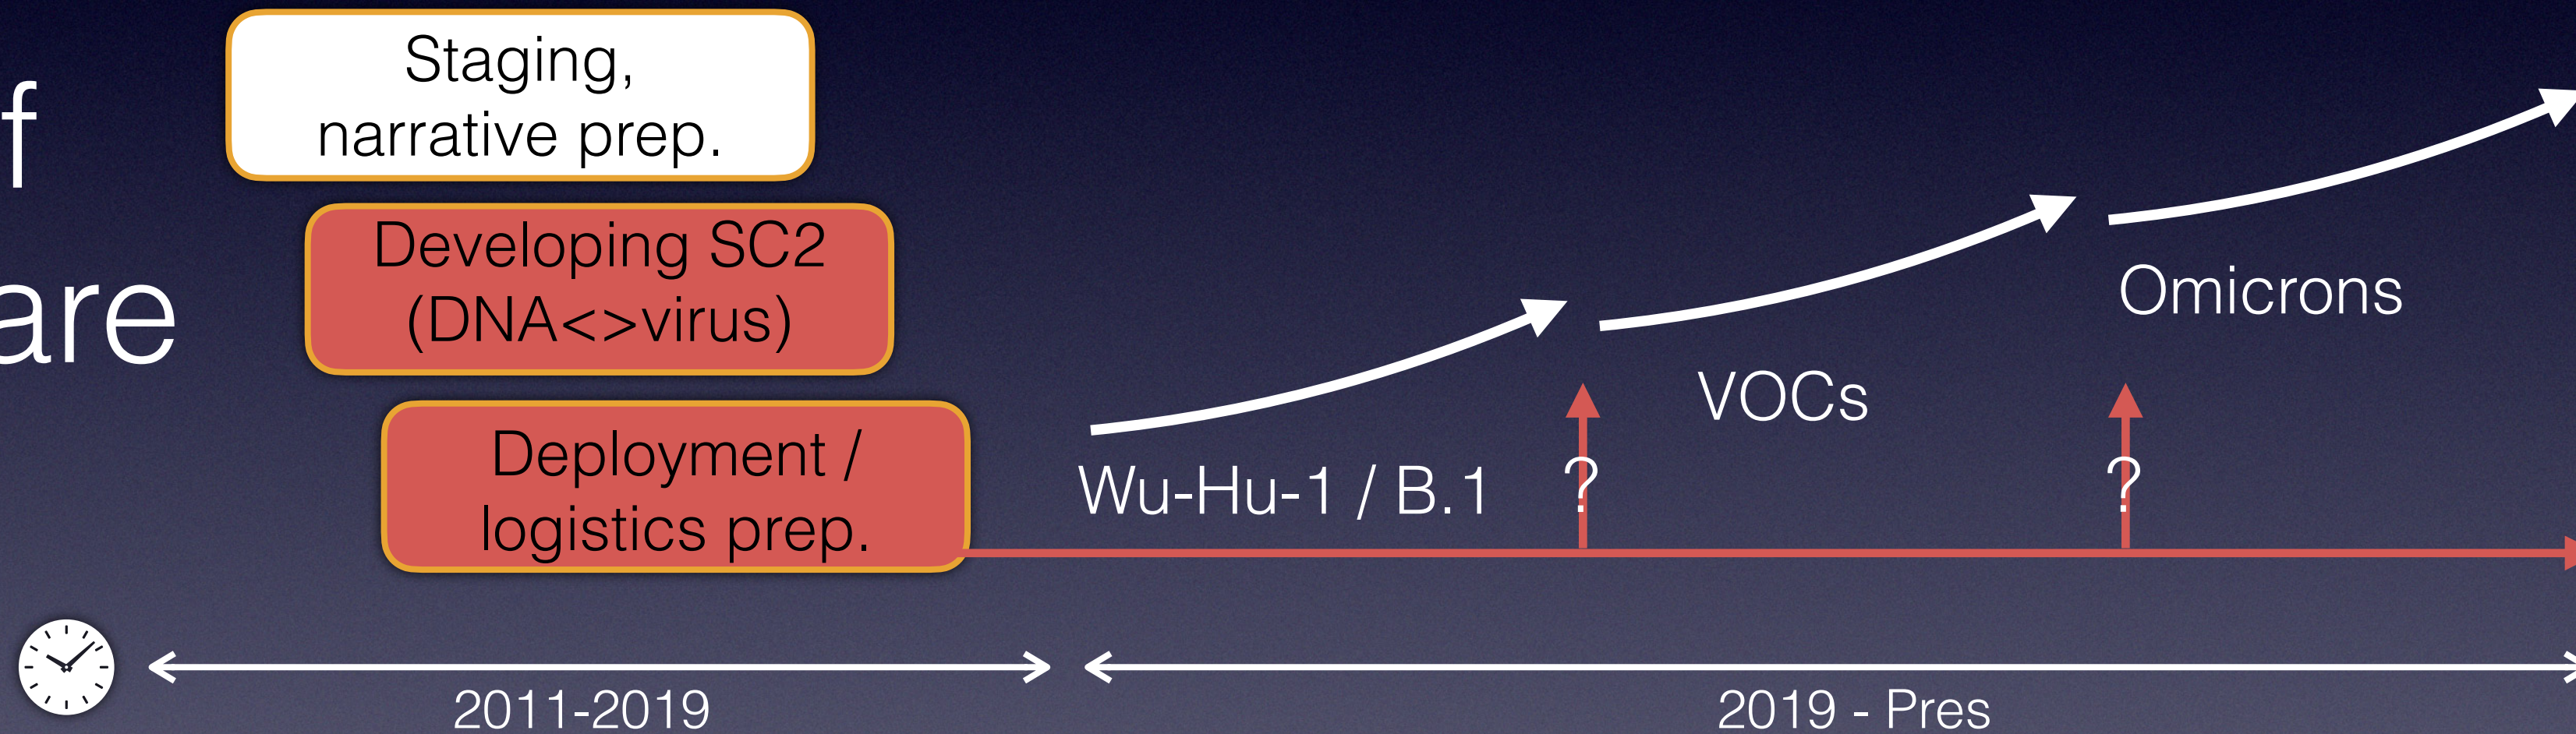

Weaknesses

- Ignores apparent signatures of intention (HIV inserts)
- Has no actual empirical precedent (WIV did not invent GOF)
- No proof (vs. Pandora's GOF potentially artificial proof)
- Can't lead to "justice" (punish DEFUSE and done)

Pandora's GOF

Fog of Biowarfare

"IC" + Scooby-doo

Weaknesses

- Ignores apparent signatures of intention (HIV inserts)
- Has no actual empirical precedent (WIV did not invent GOF)

- No proof (vs. Pandora's GOF potentially artificial proof)

- Can't lead to "justice" (punish DEFUSE and done)

- Theory is flawed ("swarms," RNA instability) - asserts impossible what is possible

- Doesn't match observations
